Design Construction Maintenance

University Landscaping is a company that has been committed to pleasing our customers in Edmonton and surrounding areas for over 20 years.

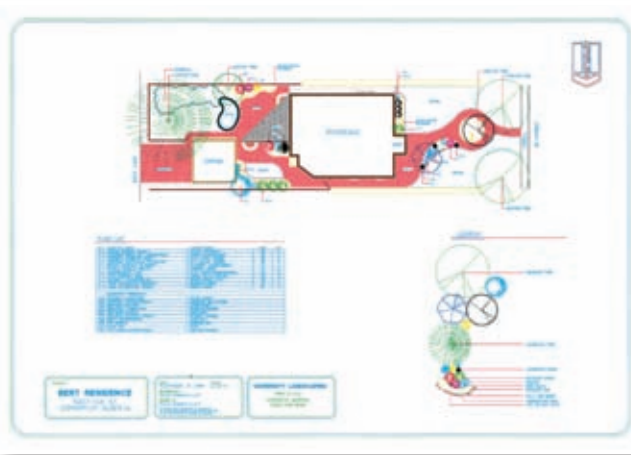

Offering quality in design, construction, and maintenance provides our company the ability to satisfy any of your landscaping requirements.

University Landscaping is fully qualified to make certain of all your landscaping needs are taken care of.

Using the latest in computer technology, our professional landscape designers will create an innovative and unique design that will be to scale, have a complete list of plants and products, as well as, an itemized list of costs.

Our designer is also able to produce a three dimensional graphical representation of your design using a scanned picture of your property and the most recent software in landscape design.

Sample of Computer Design

Our professional landscapers are able to construct any landscape from a low-maintenance rock garden to an elaborate Japanese garden.

We can install retaining walls, cobblestone patios, ponds, irrigation systems, planting beds and anything else that would enhance the beauty and functionality of your landscaping.
